

# Mark Warner turn to OCA outboard covers

## Splash Covers - just what your engine needs

Having trialled OCA's 'Splash Covers' on their outboard engines in four resorts last year, Mark Warner have ordered covers for all the engines throughout their remaining resorts.

'We like to maintain our support and ski boats in top condition – they take quite a battering being on the water day in, day out, for weeks on end. We're delighted with the protection these covers afford,' said Charlie Faulkner, Waterfront Manager, Mark Warner.

OCA's 'Splash Covers' are designed specifically to remain on

the cowling at all times, even whilst the engine is running. The covers fit over the engine like a second skin and are fully vented where needed. With over 850 model-specific patterns, OCA manufacture to order to ensure the perfect fit. The covers protect the engines from UV fading, saltwater and rainwater corrosion, and accidental damage from water toys like skis and wakeboards. OCA custom print for many other commercial clients including the RNLI and the MOD.
