

Suzuki Outboard Covers

Outboard Covers is proud to announce its partnership with Suzuki Australia and GB as official suppliers of branded covers for their full range of outboard engines from 40hp upwards.

The covers are made-to-measure using Polysoft® - a water resistant breathable material that is fleece lined providing ultimate protection against the elements and accidental damage. It is also totally UV stable and guaranteed from rotting or fading for 5 years.

OCA manufactures 2 type of cover:

Full Covers are designed to be used during storage and towing to protect from road grime, water salt and other damage.

They are cut to fit each model individually and incorporate a strap that secures around the leg to keep it tight during towing. There is also a mesh vent at the bottom that allows any water in the motor to drain away.

As the Polysoft is breathable there is no build up of moisture or condensation within the cover preventing corrosion occurring.

Splash® Covers are fully vented and designed to be left on even when the motor is running. They protect the cowling from damage whilst on the water and from UV fading.

The Suzuki powered Vampire rib successfully completed the Round Britain Race, with the protection and noise reduction benefits of OCA Splash® covers

For ultimate protection and a great discount we recommend ordering both Splash® and Full Covers and receiving our Combo deal.

Delivery is 2-3 weeks.
